DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-6, 8 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lauermann et al. '613 in view of Harrigan et al. Lauermann et al. (Fig. 2) discloses a tool holder for a core bit. The tool holder has a bit side axial stop surface (23). The outer profile of the end side extending away from the bit stop is one of threads. This cooperates with the inner profile of the core bit. The axial stop surface has an axial conical surface on a portion of it, the rounding of the nut portion is broadly read as this surface. Lauermann et al. '613 does not disclose that there is a spline profile in addition to the threads of the outer profile of the tool. Now does it disclose that there are at least 6 equally spaced splines. Nor does it disclose that the axial length of the end of the tool is greater than the radial dimension of the threaded portion. Harrigan et al. discloses a tool with a length of threading (46) that has a number of splines (45) within it. There is at least 6 splines that are equally spaced. The axial length of the end of the tool is greater than the radial dimension of the threaded portion. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the splined threads of Harrigan et al. on the tool of Lauermann et al. This would be done to allow the use of the tool on something with both splines and threads as shown in Harrigan et al.

Art Unit: 3672

Allowable Subject Matter

3. Claims 7, 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel P. Stephenson whose telephone number is (571) 272-7035. The examiner can normally be reached on 8:30 - 5:00 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on (571) 272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
